Photographs Taken During Mobilization Events
MAY 2013 MOBILIZATION

Photo A-1  Great Lakes Restoration Initiative project sign (located adjacent to the trailhead of the northernmost trail in the eastern portion of the Park), near the Park entrance. Areas that were mechanically treated in 2012 are evident in the background.

Photo A-2  A small population of trout lily (*Erythronium rostratum*) found the spring following the 2012 mechanical treatment near the L-shaped (or northern) pond.
Photo A-3  An individual from a small population of starry false solomon’s seal (*Maianthemum stellatum*) found in the 2012 mechanical treatment area near the L-shaped pond.

Photo A-4  Evidence of multiflora rose (*Rosa multiflora*) re-sprouting near the L-shaped pond, following 2012 mechanical treatment. Photo taken just after chemical treatment was applied.
JULY MOBILIZATION

Photo A-5  The ATV used for chemical treatment. A hose was uncoiled to treat openings and densely vegetated areas were treated with a Cardno crew member standing on the passenger seat.
A Photographs Taken During Mobilization Events

Photo A-6  Northwest corner of the USFWS grant area. View of bush honeysuckle (*Lonicera tatarica*) that used an ash tree as support to rise 20 feet above the surrounding shrub layer.

Photo A-7  A large, mature common buckthorn (*Rhamnus cathartica*) located in the north-central portion of the USFWS grant area. The walking stick directly in front of the tree is approximately 5.5 feet tall.
A Photographs Taken During Mobilization Events

Photo A-8  Sprouting bebb willow (Salix bebbiana) live stake planted by volunteers in April 2013.

Photo A-9  Cardno’s crew leader chemically treating an area in the USFWS grant area, just south of the 2012 treatment area near the L-shaped pond.
Photo A-10  Mechanical treatment conducted by Cardno in the west-central portion of the USFWS grant area.

Photo A-11  The FECON Bull Hog Forestry Mulcher used for mechanical treatment.
A Photographs Taken During Mobilization Events

Photo A-12  A monarch butterfly found in the USFWS grant area.

Photo A-13  Carndo certified applicator chemically treating bush honeysuckle and multiflora rose in the south central portion of the USFWS grant area.
A Photographs Taken During Mobilization Events

Photo A-14  A multiflora rose that had been chemically treated in May in the south-central portion of the USFWS grant area.

Photo A-15  View of area after mechanical IS treatment in southwest portion of the NFWF grant area.
Photo A-16 Common buckthorn, multiflora rose, and bush honeysuckle near the western end of the USFWS/NFWF grant area boundary.
NOVEMBER MOBILIZATION

Photo A-17  Cardno chemically treating an area in the northwest corner of the USFWS grant area that had been previously mechanically treated.

Photo A-18  View of portion of the 2012 mechanical treatment area located in the north-central portion of the USFWS grant area.
A view from the ATV in the northeast portion of the USFWS grant area. Field crews pushed through densely vegetated areas with an ATV to locate IS that were difficult to see from a distance.

A red-tailed hawk located near the maintenance garage.
Photo A-21  View of multiflora rose that had been found growing over an apple tree near the L-shaped pond. It reached about 20 feet in height. The walking stick is front is approximately 5.5 feet tall.
A girdled green ash (Fraxinus pennsylvanica) tree located in the low density shrubland – grassland toward the western end of the USFWS/NFWF grant areas boundaries.
A Photographs Taken During Mobilization Events

Photo A-23  Chemically treating common buckthorn and bush honeysuckle in the southwest corner of the NFWF grant area.

Photo A-24  A view of robust pickerel weed (*Pontederia cordata*) in the emergent wetland fringe along the edge of the large (more southern) pond.
A Photographs Taken During Mobilization Events

Photo A-25  Cardno chemically treating the northwest corner of the USFWS grant area.

Photo A-26  Upland restoration plantings in the central portion of the USFWS grant area.
A Photographs Taken During Mobilization Events

Photo A-27  Restoration plantings in the central portion of the USFWS grant area.

Photo A-28  View from and of emergent potholes to the west of the large pond in the NFWF grant area.
A Photographs Taken During Mobilization Events

Photo A-29  Restoration plantings along the L-shaped pond in the USFWS grant area.

Photo A-30  Trays of wetland plant plugs at the staging area.
Photo A-31  Container material at the staging area.
